

IN THE CLAIMS

Please amend the claims as follows:

1 - 26. (Cancelled)

27. (New) A projection method comprising:

projecting an image; and

projecting a text box with text on top of the image, with the text box having diffused borders.

28 (New) The projection method of claim 27, wherein said projecting of the text box comprises

modifying light projected by a light source, employing a light path modifier;

providing the modified light to a display device through a relay lens having an object plane, from which the light path modifier is offset to effectuate the diffused borders of the text box; and

further providing the modified light from the display device to a projection lens.

29. (New) The projection method of claim 28, wherein said modifying comprises modifying the light projected by the light source employing an integrator tunnel with reflective walls.

30. (New) The projection method of claim 28, wherein said modifying comprises modifying the light projected by the light source employing a pair of fly eye panels.
